

SCREEN VIEW: may be filtered or contain unapplied edits. Export Printable HTML for the complete compiled check kit. Unapplied edits. Records and exports are locked until you regenerate.

For isolated, disconnected, wire-only passive assemblies

Exclude mains, batteries, components, and safety-critical use. No hardware control, pinout inference, resistance thresholds, or electrical certification.

“User pass” is a manually entered record. It is not measured evidence or a statement of safety.

ProbePlan — User-entered records only. Not measured evidence or electrical certification.

02 / CHECK

Every pair, accounted for

Expected connections and expected non-connections, together in one complete checklist.

6 all pairs	2 Connected	4 Not connected	4 pins
----------------	----------------	--------------------	-----------

0 / 6 recorded Map reference 1B7AE318

Untested 6 User pass 0 User fail 0 Skipped 0

Record counts do not establish test quality. Untested or skipped pairs are never counted as passes.
